A middle aged female presented to the Department of Obstetrics and Gynaecology complaining of lower abdomen swelling, which had been present for over a year, but getting progressively bigger over time. Ultrasound imaging confirmed the presence of a pelvic mass and imaging on multi-slice computed tomography (MSCT) are shown above: Coronal (Panel A) and Sagittal (Panel B) planes. Surgery was performed.

**What is the diagnosis?**

**Answer:** refer to page 58
